

Course LACAC-TSA
“Quality Control and
Technology AVSEC”
 (Brasília, Brazil, 21 to 25 September, 2015)

OBJECTIVES AND AGENDA

OBJECTIVES

Intended Outcome

By the end of the course, participants should be able to describe the differences between surveys, audits, inspections, and tests, as well as create audit and inspection checklists for the airport.

This course provides in-depth exposure to ICAO standards and recommended practices for effective quality control processes of civil aviation security programs. It is geared toward the managers and planners for quality control; it is not a course for all inspectors to attend (i.e., not a "how to conduct inspections" course).

Key Learning Objectives:

- Purpose and function of quality control
- ICAO quality control standards and recommended practices
- Description and techniques for conducting surveys, audits, inspections, and tests
- Analysis of individual airport circumstances to determine the optimal verification monitoring activity to use

AGENDA

Agenda	Module
Day 1	<ul style="list-style-type: none"> • Aviation Security Quality Control Program
Day 2	<ul style="list-style-type: none"> • Security Surveys • Security Audits
Day 3	<ul style="list-style-type: none"> • Security Inspections
